

SPOTSIGHT™

PROGENERO
Products

Developed in partnership with **EWI**

Most advanced NDT system

Non-Destructive Test (NDT) system for Resistance Spot Welds (RSW) for the automobile industry.

Usable for inspection of many types of welds, materials, coatings.

- **GEL COUPLANT FREE** - no gel couplant required to buy, use, or cleanup
- **MINIMAL TRAINING** - users are productive within 1 day
- **FAST PROCESSING** - instantaneous results (as little as 5 seconds/weld)
- **ACCURATE RESULTS** - shown on display and captured to memory

Quick and easy set up and use :

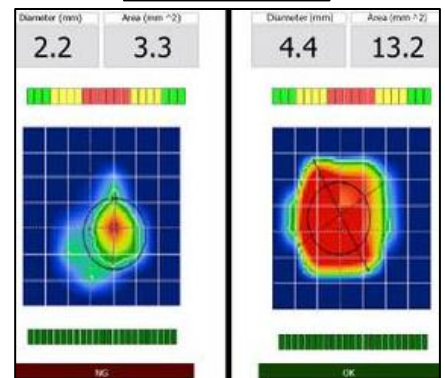

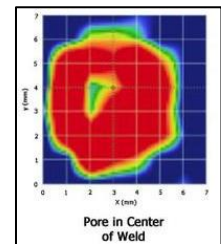

- Easy to set up profiles to maximize accuracy and speed
- Records inspection results for post-process review
- Run stand alone or connect to network
- Wireless remote for ease of use

Probe designed for optimal performance :

- No gel couplant required (*no gel couplant to cleanup*)
- Spherical 64 element array (quick, accurate results)
- High speed processing Matrix Phased Array (MPA)
- Flexible probe tip conforms to weld shape
- 3 meter cord for convenient reach

Cost Savings :

- No gel to buy, use, clean up
- Minimal training needed
- Faster, more accurate results
- More productivity with fewer personnel

RSW Measurement abilities:

- Diameter: 2.5mm to 8.7mm
- Stack-up Thickness: 0.5mm to 6mm
- Inspection Speed: as fast as 5 Sec / weld
